**DETAILED ACTION**

***Allowable Subject Matter***

Claims 10, 12-16 and 18 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art is listed on the PTO 892 forms of record. None of the references anticipate or make obvious, *inter alia*, implanting a dopant through a perforated mask to define multiple spotted implants in the substrate, and annealing the device to cause the multiple spotted implants to form the continuous isolation region, wherein the relative size and separations of the perforations in the mask is controlled to control the dopant density of the isolation region. Moreover, none of the references anticipate or make obvious, *inter alia*, forming an isolation layer in a substrate of a snapback device, and thereafter forming an active region above the isolation layer, wherein forming the isolation layer includes forming spotted implants in the substrate and annealing the device to cause the spotted implants substantially to combine to form said isolation region, the size and separation of the spotted implants is chosen to provide an isolation region of desired doping density as required by some of the present claims. Therefore, the claims are allowable over the cited prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
